

Seawater Assistant (Ardmair, Corry, Ardessie)

You will take part in all salmon husbandry operations on our sea farms including feeding and movement of feed, stock health monitoring, weighing and grading fish and harvesting. The job also includes site maintenance including lifting and changing of nets, as well as assisting with recording feed levels and environmental data.

Experience is not essential as training is provided, though an ability to deal with all weathers is essential. Applicants should be physically fit - most of the work is outdoors and there is a requirement to persevere often under severe weather conditions. A driving licence and access to a vehicle would be desirable due to the location of our farms, though transport can be provided.

This is a full-time position, though part-time/flexible hours will be considered. The starting pay rate is £10.88 per hour (subject to good attendance).

Employees are eligible to join our contributory pension scheme and discretionary bonus scheme following satisfactory completion of a probationary period.
